NCL Fall 2024 Individual Game Scouting Report

Dear Jared Duron,

Thank you for participating in the National Cyber League (NCL) Fall 2024 Season! Our goal is to prepare the next generation of cybersecurity professionals, and your participation is helping achieve that goal.

The NCL was founded in May 2011 to provide an ongoing virtual training ground for collegiate students to develop, practice, and validate their cybersecurity skills in preparation for further learning, industry certifications, and career readiness. The NCL scenario-based challenges were designed around performance-based exam objectives of CompTIA certifications and are aligned to the National Initiative for Cybersecurity Education (NICE) Cybersecurity Workforce Framework published by the National Institute of Standards and Technology (NIST).

As you look to a future career in cybersecurity, we hope you find this report to be valuable in both validating skills and identifying areas for improvement across the nine NCL skills categories. You can use this NCL Scouting Report to:

- Validate your skills to employers in any job application or professional portfolio;
- Show case your achievements and strengths by including the Score Card view of your performance as part of your résumé or simply sharing the validation link so that others may view the detailed version of this report.

The NCL Fall 2024 Season had 9,260 students/players and 573 faculty/coaches from more than 540 two- and four-year schools & 230 high schools across all 50 U.S. states registered to play. The Individual Game Capture the Flag (CTF) event took place from October 25 through October 27. The Team Game CTF event took place from November 8 through November 10. The games were conducted in real-time for students across the country.

NCL is powered by Cyber Skyline's cloud-based skills evaluation platform. Cyber Skyline hosted the scenario-driven cybersecurity challenges for players to compete and track their progress in real-time.

To validate this report, please access: cyberskyline.com/report/NBCJXVCDV5PL

CompTIA

Based on the performance detailed in this NCL Scouting Report, you have earned **10 hours** of Continuing Education Units (CEUs) as approved by CompTIA. You can learn more about the NCL - CompTIA alignment via nationalcyberleague.org/partners.

Congratulations for your participation in the NCL Fall 2024 Individual Game! We hope you will continue to develop your knowledge and skills and make meaningful contributions as part of the Information Security workforce!

Dr. David Zeichick
NCL Commissioner

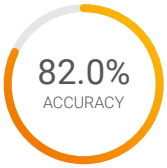
NCL Fall 2024 Individual Game

The NCL Individual Game is designed for student players nationwide to compete in realtime in the categories listed below. The Individual Game evaluates the technical cybersecurity skills of the individual, without the assistance of others.

495 TH PLACE OUT OF 8484
NATIONAL RANK

2055 POINTS OUT OF 3000
PERFORMANCE SCORE



95th National Percentile

Average: 1008.9 Points

Average: 67.8%

Average: 41.1%

Cryptography

270 POINTS OUT OF 330

93.3% ACCURACY

COMPLETION: 82.4%

Identify techniques used to encrypt or obfuscate messages and leverage tools to extract the plaintext.

Enumeration & Exploitation

220 POINTS OUT OF 330

80.0% ACCURACY

COMPLETION: 66.7%

Identify actionable exploits and vulnerabilities and use them to bypass the security measures in code and compiled binaries.

Forensics

165 POINTS OUT OF 315

83.3% ACCURACY

COMPLETION: 62.5%

Utilize the proper tools and techniques to analyze, process, recover, and/or investigate digital evidence in a computer-related incident.

Log Analysis

300 POINTS OUT OF 300

68.4% ACCURACY

COMPLETION: 100.0%

Utilize the proper tools and techniques to establish a baseline for normal operation and identify malicious activities using log files from various services.

Network Traffic Analysis

220 POINTS OUT OF 320

72.2% ACCURACY

COMPLETION: 92.9%

Identify malicious and benign network traffic to demonstrate an understanding of potential security breaches.

Open Source Intelligence

275 POINTS OUT OF 355

84.0% ACCURACY

COMPLETION: 91.3%

Utilize publicly available information such as search engines, public repositories, social media, and more to gain in-depth knowledge on a topic or target.

Password Cracking

195 POINTS OUT OF 340

100.0% ACCURACY

COMPLETION: 67.9%

Identify types of password hashes and apply various techniques to efficiently determine plaintext passwords.

Scanning & Reconnaissance

200 POINTS OUT OF 300

63.6% ACCURACY

COMPLETION: 70.0%

Identify and use the proper tools to gain intelligence about a target including its services and potential vulnerabilities.

Web Application Exploitation

110 POINTS OUT OF 310

100.0% ACCURACY

COMPLETION: 50.0%

Identify actionable exploits and vulnerabilities and use them to bypass the security measures in online services.

Note: Survey module (100 points) was excluded from this report.

Jared Duron
jduron1@csuchico.edu

Cryptography Module

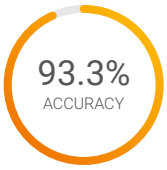
Identify techniques used to encrypt or obfuscate messages and leverage tools to extract the plaintext.

963 RD PLACE OUT OF 8484
NATIONAL RANK

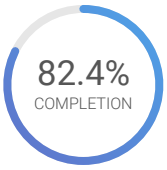
89th National Percentile

270 POINTS OUT OF 330
PERFORMANCE SCORE

Average: 209.0 Points



Average: 72.6%



Average: 64.6%

Bases (Easy)

30 POINTS OUT OF 30

100.0% ACCURACY

COMPLETION: 100.0%

Analyze and obtain the plaintext from messages encoded with common number bases.

Shift (Easy)

40 POINTS OUT OF 40

100.0% ACCURACY

COMPLETION: 100.0%

Analyze and obtain the plaintext for a message encrypted with a shift cipher.

Number Codes (Easy)

40 POINTS OUT OF 40

100.0% ACCURACY

COMPLETION: 100.0%

Analyze and obtain the plaintext for a message encoded using ASCII codes.

NATO (Easy)

40 POINTS OUT OF 40

100.0% ACCURACY

COMPLETION: 100.0%

Analyze and obtain the plaintext for a message encoded using the NATO alphabet.

Message Signature (Medium)

60 POINTS OUT OF 60

100.0% ACCURACY

COMPLETION: 100.0%

Identify tampered emails by using PGP signatures.

Beep Beep (Medium)

60 POINTS OUT OF 60

75.0% ACCURACY

COMPLETION: 100.0%

Decoded a message that is spelled out using dial tone sounds.

Tampered (Hard)

0 POINTS OUT OF 60

0.0% ACCURACY

COMPLETION: 0.0%

Use CRC checksums to identify a tampered message.

Jared Duron
jduron1@csuchico.edu

Enumeration & Exploitation Module

Identify actionable exploits and vulnerabilities and use them to bypass the security measures in code and compiled binaries.

894 TH PLACE OUT OF 8484
NATIONAL RANK

Rules of Conduct (Easy)

25 POINTS OUT OF 25

100.0% ACCURACY

COMPLETION: 100.0%

Introductory challenge on acceptable conduct during NCL.

Vinyl (Easy)

40 POINTS OUT OF 40

60.0% ACCURACY

COMPLETION: 100.0%

Analyze an image using metadata and file properties.

Coordinates (Easy)

60 POINTS OUT OF 60

100.0% ACCURACY

COMPLETION: 100.0%

Geolocate the physical location of a server using an IP address.

NFT (Medium)

60 POINTS OUT OF 60

100.0% ACCURACY

COMPLETION: 100.0%

Conduct blockchain analysis to attribute the ownership of a NFT.

Git (Medium)

75 POINTS OUT OF 75

83.3% ACCURACY

COMPLETION: 100.0%

Obtain private company information that was posted on social media.

Password (Hard)

15 POINTS OUT OF 95

50.0% ACCURACY

COMPLETION: 33.3%

Use coordinates and a SSID to search for a location and find information from public images.

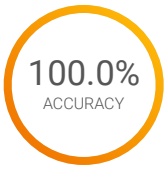
Jared Duron
jduron1@csuchico.edu

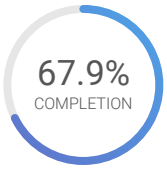
Password Cracking Module

Identify types of password hashes and apply various techniques to efficiently determine plaintext passwords.

171 ST PLACE OUT OF 8484
NATIONAL RANK

195 POINTS OUT OF 340
PERFORMANCE SCORE





98th National Percentile

Average: 101.6 Points

Average: 87.6%

Average: 36.6%

Hashing (Easy)

15 POINTS OUT OF 15

100.0% ACCURACY

COMPLETION: 100.0%

Generate password hashes for MD5, SHA1, and SHA256.

Rockyou (Easy)

30 POINTS OUT OF 30

100.0% ACCURACY

COMPLETION: 100.0%

Crack MD5 password hashes for password found in the rockyou breach.

Windows (Easy)

30 POINTS OUT OF 30

100.0% ACCURACY

COMPLETION: 100.0%

Crack Windows NTLM password hashes using rainbow tables.

Pattern (Medium)

45 POINTS OUT OF 45

100.0% ACCURACY

COMPLETION: 100.0%

Build a wordlist or pattern rule to crack password hashes of a known pattern.

ZIP (Medium)

50 POINTS OUT OF 50

100.0% ACCURACY

COMPLETION: 100.0%

Crack the insecure password for a protected zip file.

Wordlist (Hard)

15 POINTS OUT OF 65

100.0% ACCURACY

COMPLETION: 50.0%

Build a wordlist to crack passwords not found in common wordlists.

Complexity (Hard)

10 POINTS OUT OF 105

100.0% ACCURACY

COMPLETION: 25.0%

Build a custom wordlist to crack passwords by augmenting permutation rules using known password complexity requirements.

Jared Duron
jduron1@csuchico.edu

Scanning & Reconnaissance Module

Identify and use the proper tools to gain intelligence about a target including its services and potential vulnerabilities.
